DAY 1 · HOW AN AGENT WORKS

SLIDES

Introduce the vocabulary

Explain how an AI agent works

DEMOS / LABS

Reinforce the learning

Show it working with real examples

1_LAB1 · PART 1 ONLY

Understand the agent backend

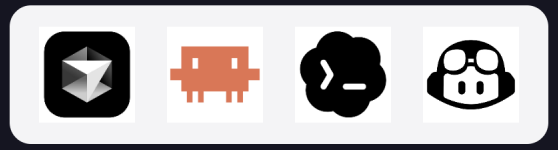

Create 2 Wi-Fi sub-agents and an orchestrator

DAY 2 · BUILD YOUR OWN AGENT

Do you have your own AI coding tool?

No

Yes!

2_LAB2

Use the LLM to create skills and sub-agents

Get closer to building your own agent in the real world

3_LAB3

Start building your own Wi-Fi AI agent

Structure your agent with your own AI tools

Create your personal sub-agents

IDEAS

- **Hamina** .openintent files
- **Ekahau** .esx files
- **pcap** files for 802.11 analysis
- **Vendor APIs** as your own MCP server: Mist, Meraki, Extreme, Ruckus, Alta Labs
- **Existing MCP servers:** NetBeez, Wyebot
- **Reporting** in your favourite tool
- **Messaging apps:** Slack, Teams
